JAVERIA IJAZ

Software Quality Assurance Engineer

Lahore, Pakistan | 0349-0164908 | khanjaveria734@gmail.com | Portfolio

PROFESSIONAL SUMMARY

Software Quality Assurance Engineer with hands-on 1 year experience testing an insurance claims management platform across web and mobile applications. Experienced in manual functional and regression testing, API testing with Postman, and integration testing, supported by requirements documentation (SRS and BRS) and day-to-day coordination with developers and business stakeholders in Agile teams. Computer Science graduate of UET Lahore. Also works remotely as a **Quality Control Officer** to **UK based company**, maintaining accurate driver and vehicle records.

CORE SKILLS

Software Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, API Testing, Web Application Testing, Mobile Application Testing, Cross-Browser Testing, UI/UX Testing

Test Documentation: Test Case Design, Test Scenarios, Test Case Execution, Defect Reporting, Defect Tracking, Bug Retesting

Business Analysis: Requirements Gathering, Business Requirements Specification (BRS), Software Requirements Specification (SRS), Stakeholder Communication,Handling Customer Queries

Tools: Postman, ClickUp, Trello, GitHub,Sheets

Methodologies: Agile, Scrum, SDLC, STLC

Programming and Databases (foundational): Python,, SQL

PROFESSIONAL EXPERIENCE

Associate Software Quality Assurance Engineer | Technocares **Nov 2025 – Present**

Project: JoClaims, an insurance claims management platform (web and mobile applications)

Manual Testing

- Perform manual functional testing of the JoClaims web and mobile applications, validating insurance claim workflows and business rules.
- Design and execute test cases and test scenarios based on business and functional requirements.
- Conduct regression testing to validate changes and identify unintended impacts, including cross-browser checks on Chrome, Firefox and Edge.
- Identify, document, report and retest defects in Jira, working with developers and stakeholders to investigate and resolve issues.

API and Integration Testing

- Test APIs using Postman, validating requests, responses, expected behaviour, error responses and relevant business outcomes.
- Test the integration between JoClaims and SNIC, validating connected workflows and data exchange between the systems.
- Investigate integration-related issues and verify expected end-to-end behaviour.

Business Analysis and Collaboration

- Gather and clarify business requirements with stakeholders and prepare Software Requirements Specifications (SRS) and Business Requirements Specifications (BRS).
- Communicate requirements to the development team and resolve requirement questions about expected business workflows.
- Participate in Agile ceremonies (stand-ups, sprint planning, sprint reviews) and support testing across insurance claim workflows and modules.

Quality Control Officer (Remote) | Cambs Private Hire Ltd Oct 2026 – Present

Administrative quality control and operational records management

- Manage and update driver records in the ICABI system, adding and maintaining driver and vehicle information.
- Review driver and vehicle documentation for accuracy and completeness, checking document details, expiry dates and registration numbers.
- Identify missing, expired or inconsistent documentation and follow up on outstanding documents.
- Maintain organised records and support operational compliance checks.
- Handle customer queries and communicate with relevant stakeholders, supporting day-to-day remote operations.

Associate SQA Trainee | Phaedra Solutions Sep 2025 – Nov 2025

Internal CMS system

- Performed manual, functional, regression, UI/UX and API testing for the company's internal CMS.
- Designed and executed detailed test cases and test scenarios to validate features.
- Reported and tracked defects in Jira and coordinated with developers on issue resolution.

Machine Learning Intern | KICKS Department, UET Lahore Jun 2024 – Aug 2024

- Developed machine learning models for text classification and natural language processing tasks.
- Improved dataset quality by 15% during Urdu language engineering research.

PROJECTS

Urdu Text Summarization Model | Python, NLP, TensorFlow

- Built an NLP model for Urdu text summarisation, achieving 87% model accuracy and reducing manual text review time by 65%.

Facial Recognition Attendance System | Python, OpenCV, TensorFlow

- Developed a facial recognition attendance system with 92% recognition accuracy, used by 50+ students.

UET Bus Alumni System | C#, ASP.NET, SQL Server

- Developed a transport booking platform for students and alumni.

Document Classification System | Python, Web Scraping

- Implemented document classification using TF-IDF and K-Nearest Neighbours (KNN).

Payroll Management System | C++

- Designed a payroll automation system for university staff.

Intelligent Tour Guide (Final Year Project) | React.js, Tailwind, AI APIs

- Developed an AI-powered travel itinerary generator.

INTERNSHIP & VIRTUAL EXPERIENCE

Software Engineering Job Simulation | Electronic Arts (Forage) Mar 2025 – Apr 2025

- Developed a system integration prototype that reduced response time by 30%.
- Worked within Agile sprint cycles to design, test and deliver software modules.

Tech Explorer Job Simulation | Commonwealth Bank (Forage) Mar 2025 – Apr 2025

- Analysed business workflows and identified opportunities for process improvement.
- Provided automation recommendations to reduce manual operational tasks.

EDUCATION

BS Computer Science | University of Engineering and Technology (UET), Lahore 2021 – 2025

Intermediate in Computer Science | Punjab Group of Colleges 2019 – 2021

Matriculation | Pak Standard Girls High School 2017 – 2019

CERTIFICATIONS

- ClickUp (Novice and Expert)
- SCRUM Certified – SCRUMstudy
- Agile Fundamentals – Simplilearn
- Software Testing – Great Learning
- Data Structures and Algorithms – Simplilearn
- MERN Stack – Simplilearn
- Microsoft Word Specialist
